

TURTLE

You will need:

- 8 Neon Green sticks
- 8 Green sticks
- 1 Red stick
- 1 Neon Blue stick
- Dome Molding Tool

Crimper Cutters 

1

Step 1:

Wrap the dome molding tool in neon green sticks (8 sticks in total).

2

Step 2:

Once it is completely covered, carefully pull the sticks off of the molding tool starting at the bottom.

3

Step 3:

Use two green sticks cut in half to create 4 small ovals for the feet. Bend these ovals in half and press onto the inside of the shell for feet.

4

Step 4:

Twist together two green sticks, bend in half, and curl up to create a head and neck. Press the end of the neck into the shell so the head sticks out between two feet.

5

Step 5:

Use a small piece of red for the mouth, and two tiny pieces of neon blue for eyes.

6

Step 6:

Bend 1/2 of a green stick in half and twist to create a tail. Press into the shell opposite the turtle's head.

7

Step 7:

Use 3 green sticks criss-crossed across the top of the shell to create texture.
